

# TOP 5 VIDEO CONFERRING FEATURES

With the introduction of the 'as a service' model, video conferencing is more accessible to small and medium size business than ever before.

Products like Zoom and GO TO Meeting gives users access to HD quality video conferencing in simple to use solutions.

## SCREEN SHARING

Screen sharing is a must have feature in any video conferencing platform. Participants can share presentations and video clips to enhance collaboration.

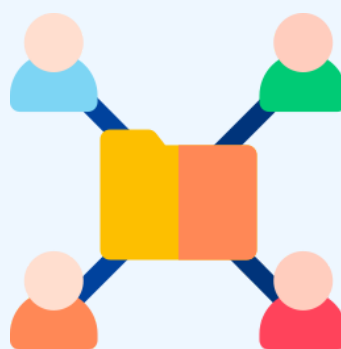

## CALENDAR INTEGRATION

Simplify user workflows by enabling calendar integration with Outlook and G-suite. Users can schedule and launch calls right from their calendar.

## BREAKOUT ROOMS

Need to split teams into different rooms to work on a project, or have a discreet conversation with select participants? Breakout rooms are the way to go!

## STREAMING & RECORDING

Streaming and recording gives you the ability to share your meeting live with multiple passive participants or record for people that missed the meeting originally. Again, great for training purposes.

## VIRTUAL BACKGROUND

On the beach but need to be 'in' the office? Virtual backgrounds allow you to set a variety of included of personalised backgrounds to hide clutter, eliminate distractions or highlight branding.
